DETAILED ACTION***Claim Rejections - 35 USC § 102***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 42 and 43 are finally rejected under 35 U.S.C. 102(e) as being anticipated by Wada et al. (6,336,850).

Wada et al. discloses all the limitations of the above claims, i.e., a method for delivering a polishing fluid to a CMP surface comprising flowing polishing fluid to the substrate and adjusting the flow by providing more fluid to the center than the periphery and then if the polishing rate is not uniform provide more fluid to the periphery to achieve a uniform polishing rate (04:40-60).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3723

4. Claims 23-27 and 43-47 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Wada et al. in view of either Birang et al (5,964,643) or Hiyama et al (5,838,447).

Wada et al. meets all the limitations of the above claims, as described in the pervious office action, e.g., adjusting the flow rate of the slurry based on the polishing rate, except for disclosing the means, i.e., by monitoring the thickness of the film by reflecting a beam. Both Birang et al. and Hiyama et al. teach determining a polishing rate of a CMP process by reflecting a beam through a window. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Wada et al. with the monitoring means as taught by either Birang et al or Hiyama et al to provide improved accuracy and further useful information about the polishing process.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Response to Arguments

6. Applicant's arguments with respect to claims 23-27 have been considered but are moot in view of the new ground(s) of rejection.
